

Guys, given the humongous size of the bundle, and since some of you won't be using too soon all the resources it contains, we decided to make a brief content description which will also work as a search catalog.

The idea is very simple: **if you're looking for a certain resource, search for it in this PDF** and all the bold headers are the names of the .Zip Files. There are 36 zip files, each of them containing the following products:
